COLLEGE ERP

Modules & Permissions Guide

A complete end-to-end walkthrough - from **login** to **logout** - covering every module, what each one does, screenshots, examples, and the permission model.

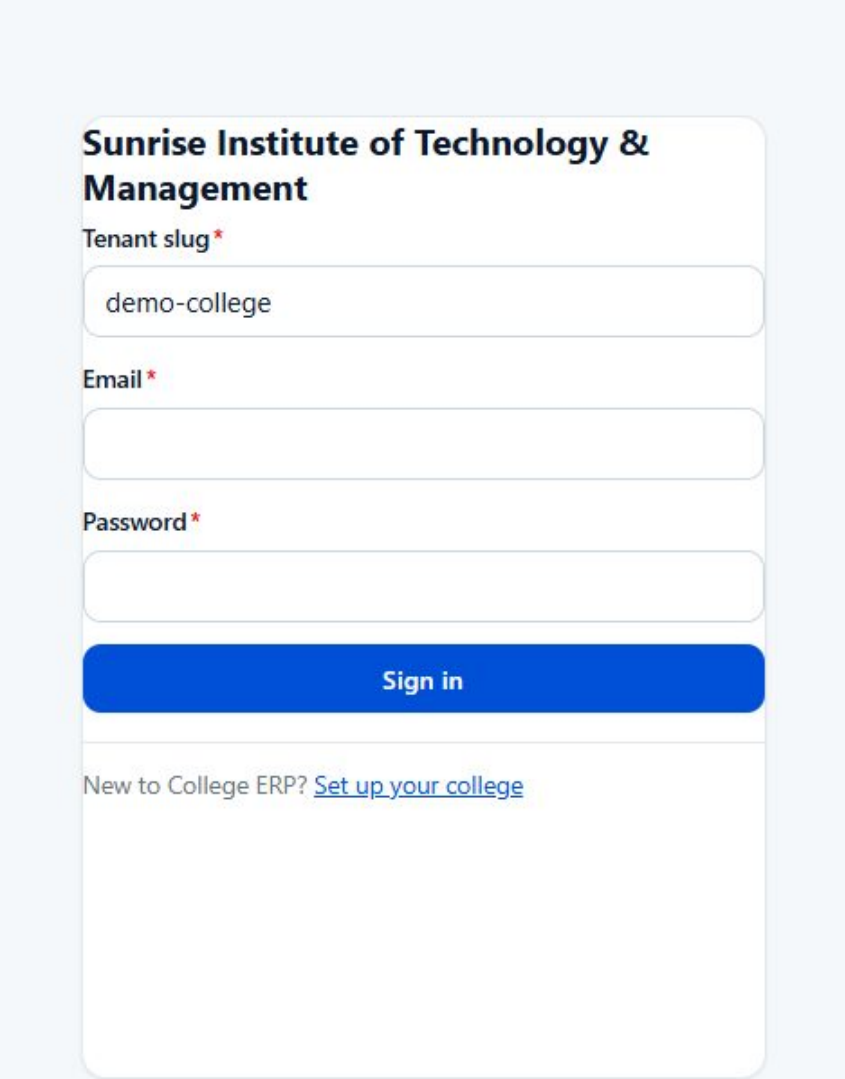

Figure 1 - Tenant login screen

Prepared for: Parth (slug: **parth**)	**Date:** 11 October 2026
App URL: http://localhost:5173	**API URL:** http://localhost:3000
Emails: parth@gmail.com • admin@sunrise-demo.edu	**Support:** this repository

1 Getting started - how you sign in

The system has two login realms, and the concepts to remember are **Tenant slug**, **Email** and **Password**.

• **Step 1.** Open the app at **http://localhost:5173**. A sign-in form appears (Figure 1).

• **Step 2.** Type the **tenant slug** - each college is its own tenant. Yours is **parth** (the demo college is **demo-college**).

• **Step 3.** Type your email - **parth@gmail.com** - and the password (**ChangeMe123!** on this local setup).

• **Step 4.** Press **Sign in**. You land on the Dashboard. From here every module is one click away in the left sidebar.

If you see 'You do not have access to this tenant.' - that usually means the browser still holds a token from a different tenant (slug). Fix: sign out, then sign in again with the right slug (**parth**).

Accounts available in this database

Tenant	Email	Password	Role
parth	parth@gmail.com	ChangeMe123!	College Admin
demo-college	admin@sunrise-demo.edu	ChangeMe123!	College Admin
platform	platform-admin@college-erp.local	ChangeMe123!	Platform Administrator

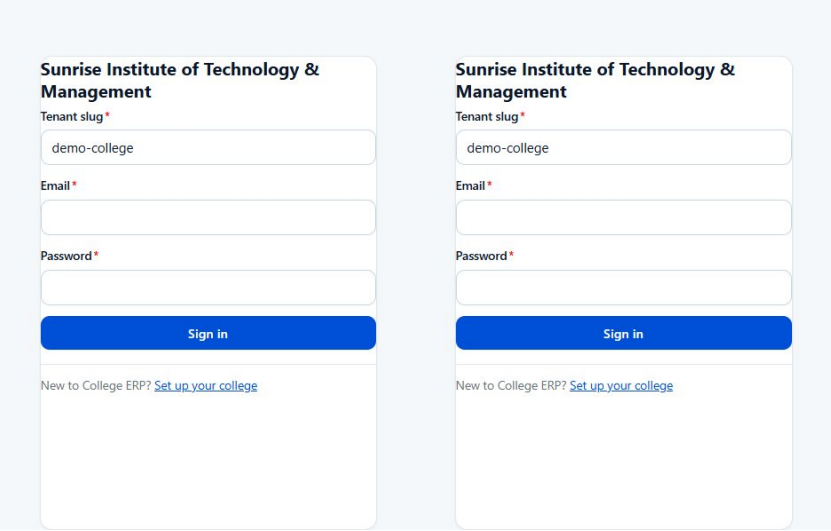

Figure 2 - Login screen (left) and the Dashboard you land on after signing in (right)

2 The Dashboard - your command centre

28	154	22	11
AVAILABLE MODULES	EFFECTIVE PERMISSIONS	ENABLED FEATURE FLAGS	ACTIVE ENTITLEMENTS

The dashboard is your home screen. It shows four headline numbers (above), a **Your modules** grid, and the global search (**Ctrl + K**). The number **154 effective permissions** answers the question *"what access do I have?"* - as College Admin (**TENANT_ADMIN** role) you hold every permission in this tenant. Other roles (Principal, Registrar, Accountant, Faculty, Student, Parent...) see only the modules their role allows.

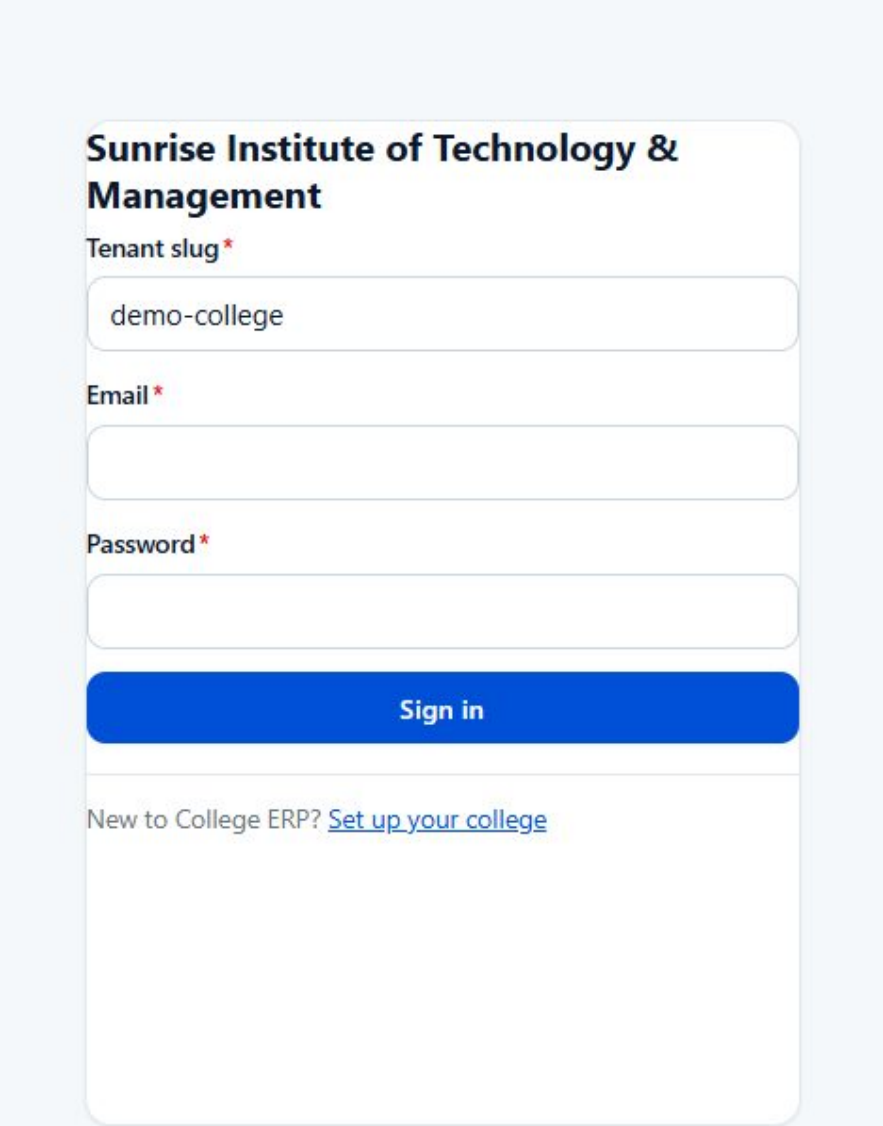

Figure 3 - Dashboard with module grid and permission summary

Module navigation - the sidebar is organised into 5 groups:

• **ACADEMICS** - Students, Admissions, Academics, Timetable, Attendance, Examinations, Certificates

• **CAMPUS & SERVICES** - Library, Inventory, Hostel, Transport, HR & Faculty, Placements, Helpdesk

- **OPERATIONS** - Notifications, Documents, Integrations, Single sign-on, Reports, Import / Export, Analytics, AI Assistant
- **ORGANIZATION** - Organization, Campuses
- **ADMINISTRATION** - Audit log, Billing, Configuration
- **Sign out** - at the bottom of the sidebar, or from the account menu.

3 All 28 modules - what each one does, with examples and permissions

Each module below is shown with a live screenshot from this database, a short description, an example of how you would use it, and the precise **permission codes** the College Admin role grants for it. A module acts as the *example* for how your tenant works - you can click straight into it from the sidebar.

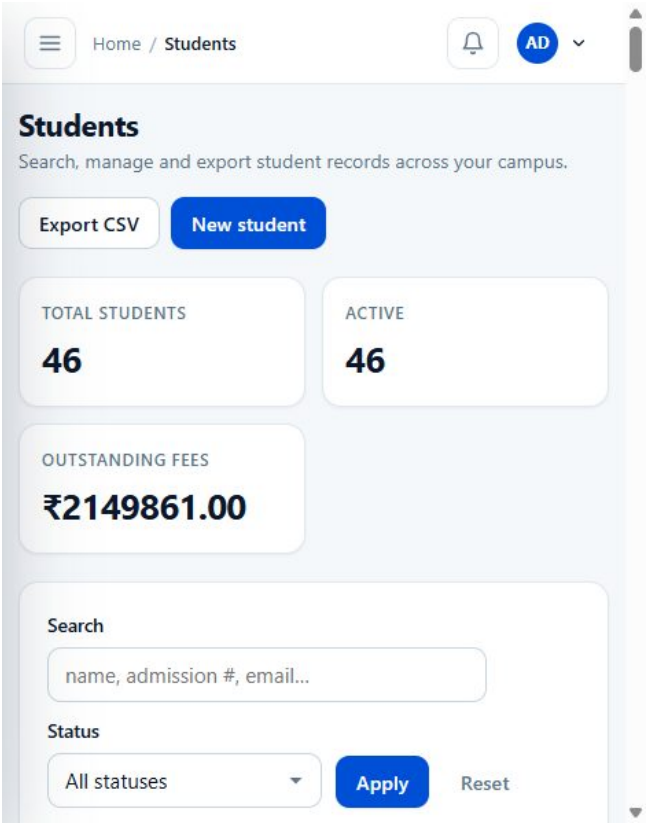

Students / students

Central register of all enrolled students - profiles, contact details, guardian info, admission data, documents and status.

Example / quick how-to > Open **Students**, use the search box to find a student (e.g. by name or roll no.), open a profile to see their documents, and use **Export** to download the list as CSV.

Permissions you have (College Admin > TENANT_ADMIN):

students.view	students.create	students.update
students.delete	students.export	students.manage

mod-03-students-2026-10-11T15-08-45-236.jpg

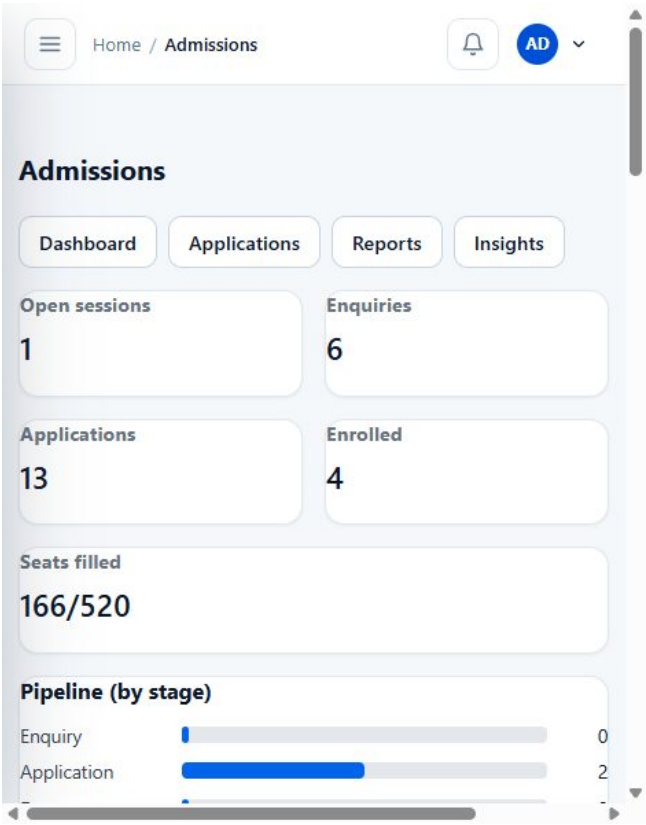

Admissions / admissions

Manage the full admission lifecycle: enquiries, applications, eligibility rules, offers, documents and fee payment against admissions.

Example / quick how-to > Review pending applications, check eligibility, approve an application, and send an admission offer to the applicant's guardian.

Permissions you have (College Admin > TENANT_ADMIN):

admissions.view admissions.create admissions.update
admissions.approve admissions.export admissions.manage

mod-04-admissions-2026-10-11T15-09-04-030.jpg

Academics / academics

Academic structure and delivery: programmes, courses/curricula, programmes offered, and academic records.

Example / quick how-to > Create a programme, add its courses, and track curriculum progress for each term and batch.

Permissions you have (College Admin > TENANT_ADMIN):

departments.read departments.manage programs.view
programs.manage academic_years.read academic_years.manage
terms.read terms.manage sections.read
sections.manage batches.read batches.manage
academics.view academics.create academics.update
academics.delete academics.manage

mod-05-academics-2026-10-11T15-09-13-204.jpg

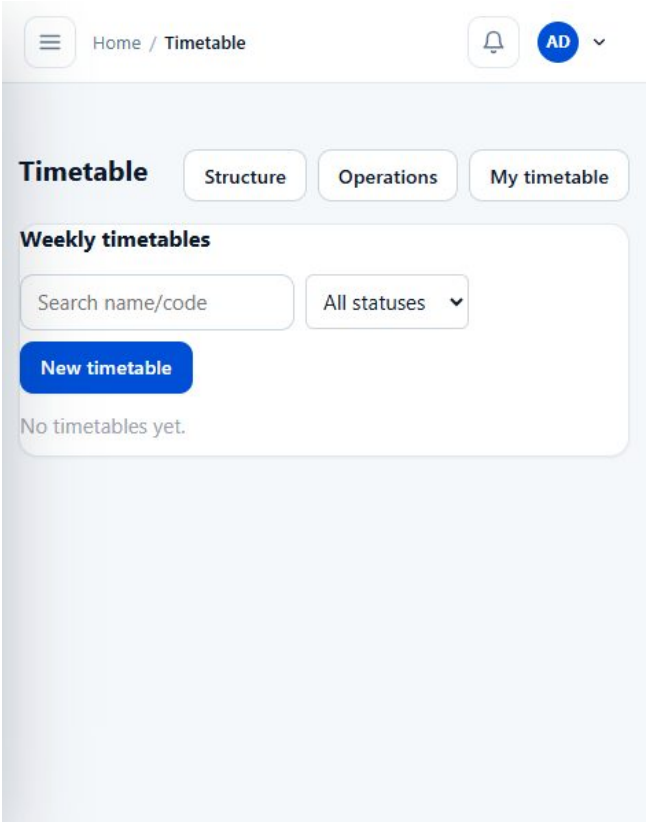

Timetable / timetable

Build, publish and view class timetables; structure timetable periods and operations per room, block and batch.

Example / quick how-to > Generate a timetable for a batch, resolve clashes, then **Publish** so students and faculty can view it.

Permissions you have (College Admin > TENANT_ADMIN):

rooms.read	rooms.manage	buildings.read
buildings.manage	timetable.view	timetable.create
timetable.update	timetable.publish	timetable.manage

mod-06-timetable-2026-10-11T15-09-28-220.jpg

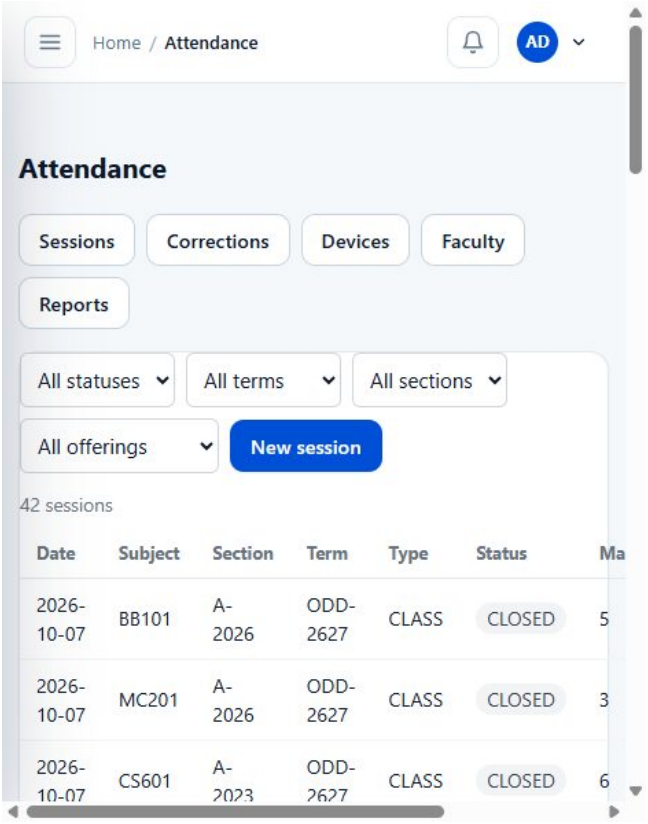

Attendance / attendance

Record and review daily attendance per class/batch, with export and reporting.

Example / quick how-to > Mark attendance for today's class, review the attendance percentage per student, and export the register.

Permissions you have (College Admin > TENANT_ADMIN):

attendance.view attendance.create attendance.update
attendance.export attendance.manage

mod-07-attendance-2026-10-11T15-09-42-575.jpg

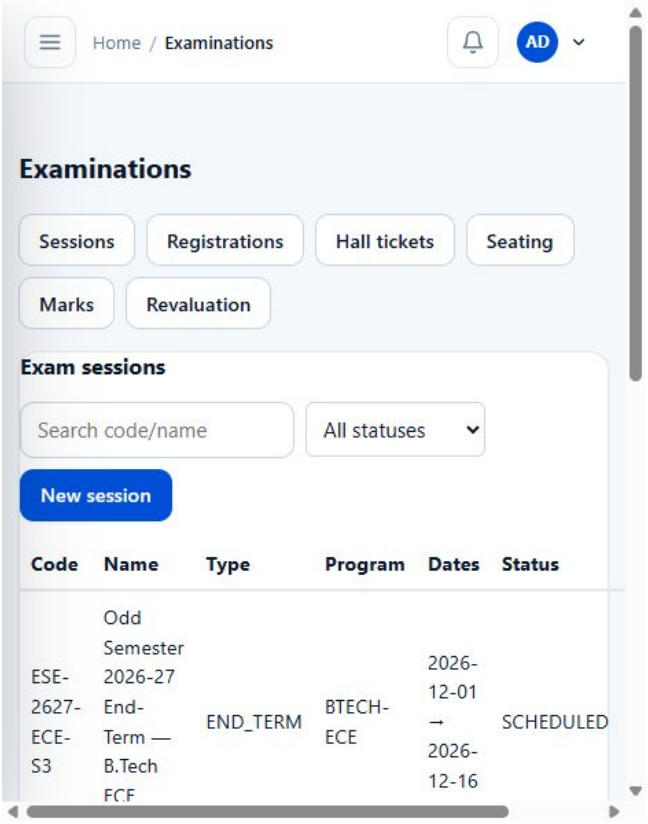

Examinations / exams

Exam setup, schedules, approvals and publishing; plus results sessions, publishing and exports.

Example / quick how-to > Create an exam, schedule it for a batch, approve, then publish results once marks are final.

Permissions you have (College Admin > TENANT_ADMIN):

exams.view exams.create exams.update
exams.approve exams.publish exams.manage
results.view results.publish results.export
results.manage

mod-08-exams-2026-10-11T15-09-54-068.jpg

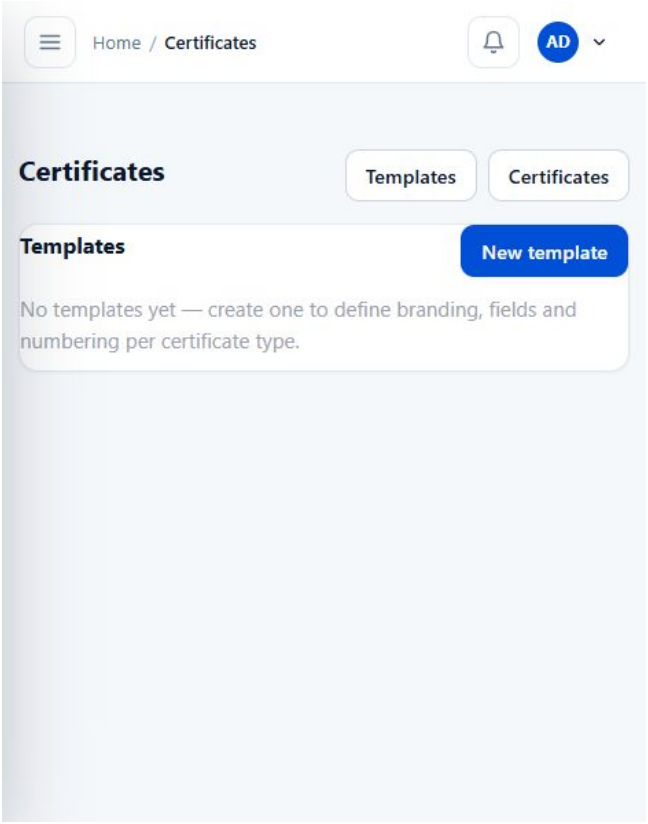

Certificates / certificates

Create, approve, issue and verify certificates (bonafide, leaving, character, etc.).

Example / quick how-to > Create a certificate for a student, route it for approval, then issue it - the public **/verify/certificate** page checks authenticity.

Permissions you have (College Admin > TENANT_ADMIN):

certificates.view certificates.create certificates.approve
certificates.export certificates.manage

mod-09-certificates-2026-10-11T15-10-06-590.jpg

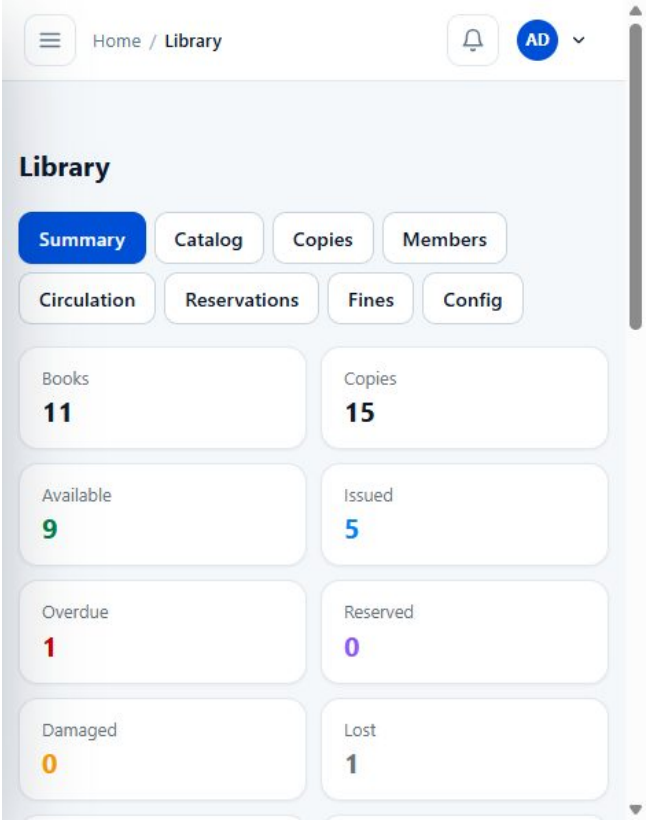

Library / library

Catalogue books, manage members and track lending within the library.

Example / quick how-to > Add a book to the catalogue, issue it to a student member, and record the return.

Permissions you have (College Admin > TENANT_ADMIN):

library.view library.create library.update
library.delete library.manage

mod-10-library-2026-10-11T15-10-15-041.jpg

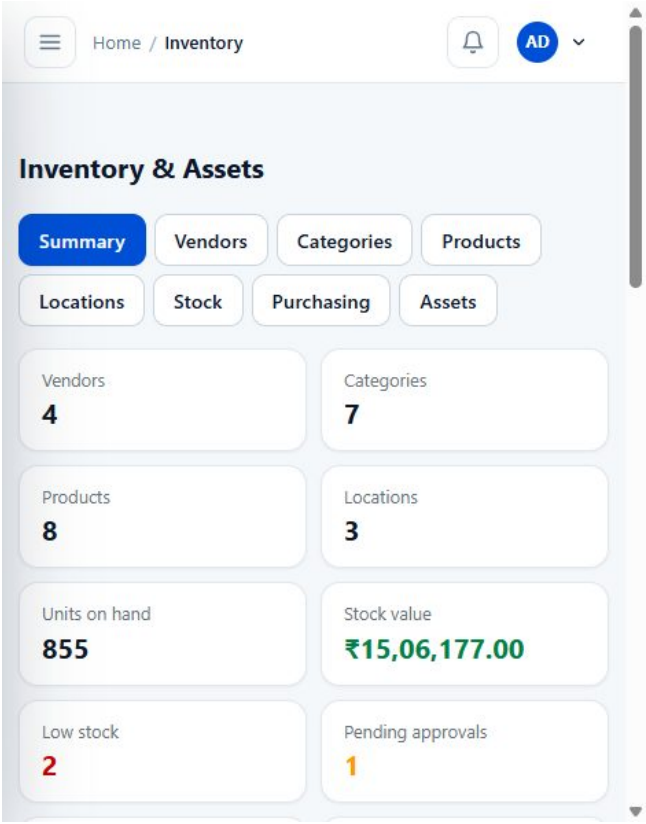

Inventory / inventory

Track assets and consumables across the campus - stock levels, issuances and usage.

Example / quick how-to > Record an asset, log a stock issue to a department, and check current stock levels.

Permissions you have (College Admin > TENANT_ADMIN):

inventory.view inventory.create inventory.update
inventory.delete inventory.manage

mod-11-inventory-2026-10-11T15-10-29-125.jpg

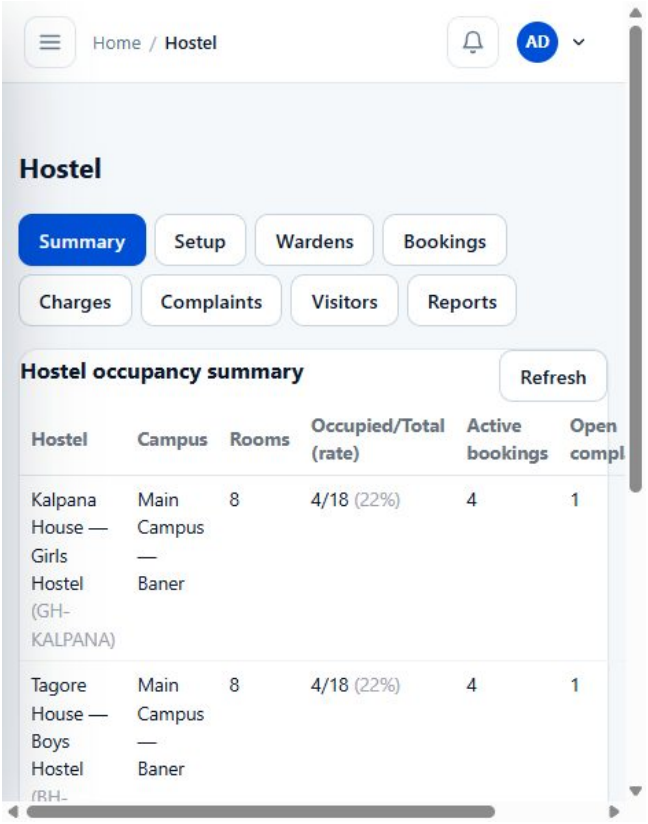

Hostel / hostel

Hostel blocks, rooms and allocations, plus fee/invoice management for hostellers.

Example / quick how-to > Allocate a room to a student, track block occupancy, and generate the hostel fee invoice.

Permissions you have (College Admin > TENANT_ADMIN):

fees.view	fees.create	fees.update
fees.refund	fees.export	fees.manage
payments.view	payments.create	payments.export
payments.manage	hostel.view	hostel.create
hostel.update	hostel.delete	hostel.manage

mod-12-hostel-2026-10-11T15-10-51-645.jpg

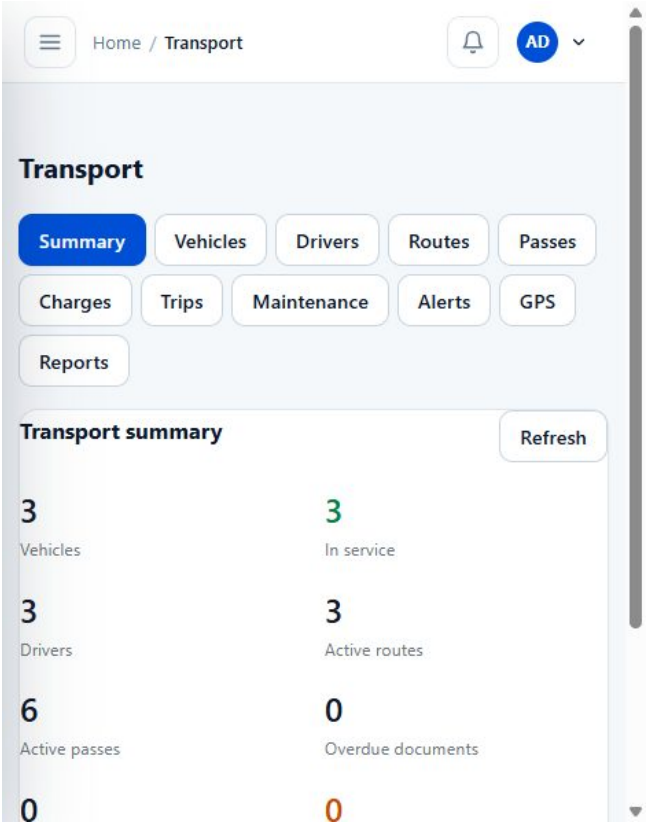

Transport / transport

Routes, vehicles and stops; manage student assignments and transport fees.

Example / quick how-to > Define a route with stops, assign vehicle capacity, and attach students to routes.

Permissions you have (College Admin > TENANT_ADMIN):

fees.view	fees.create	fees.update
fees.refund	fees.export	fees.manage
transport.view	transport.create	transport.update
transport.delete	transport.manage	

mod-13-transport-2026-10-11T15-11-11-916.jpg

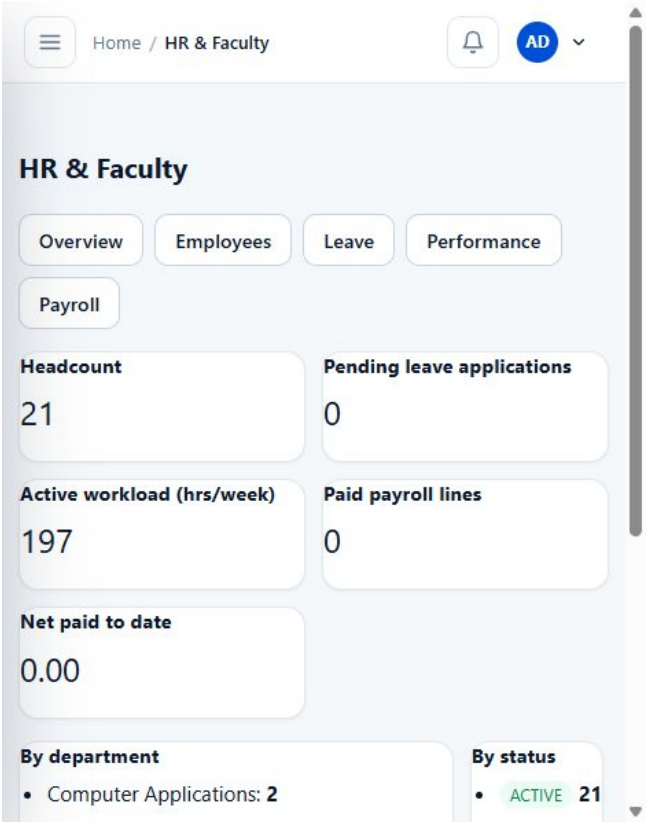

HR & Faculty / hr

Staff & faculty records, departments, leave, workload and payroll-oriented data.

Example / quick how-to > Add a faculty member to a department, record their leave, and export the staff list.

Permissions you have (College Admin > TENANT_ADMIN):

hr.view	hr.create	hr.update
hr.delete	hr.export	hr.manage

mod-14-hr-2026-10-11T15-11-25-582.jpg

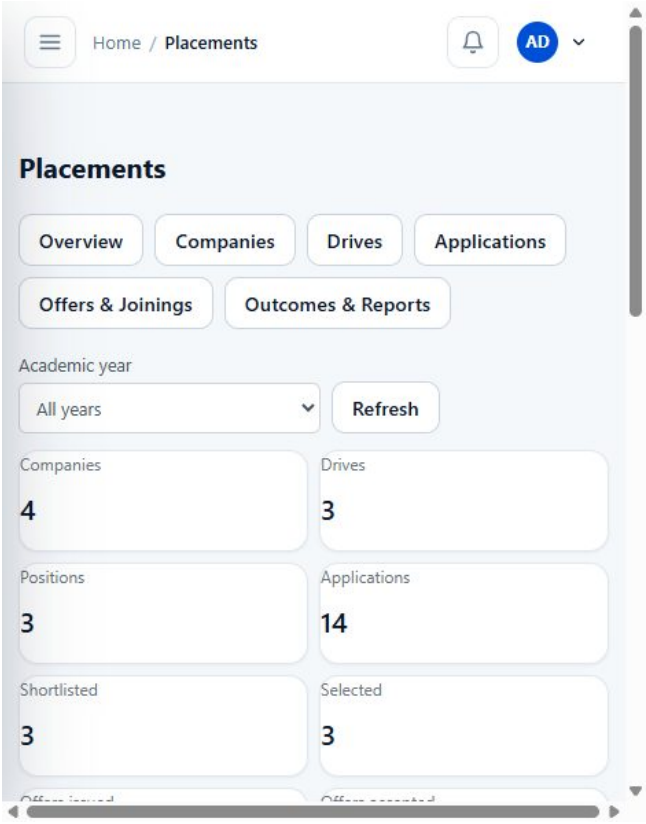

Placements / placements

Placement drives, companies, applications and placements; approvals and exports.

Example / quick how-to > Open a placement drive, add companies, shortlist applicants and approve placements.

Permissions you have (College Admin > TENANT_ADMIN):

placements.view	placements.create	placements.update
placements.approve	placements.export	placements.manage

mod-15-placements-2026-10-11T15-11-35-775.jpg

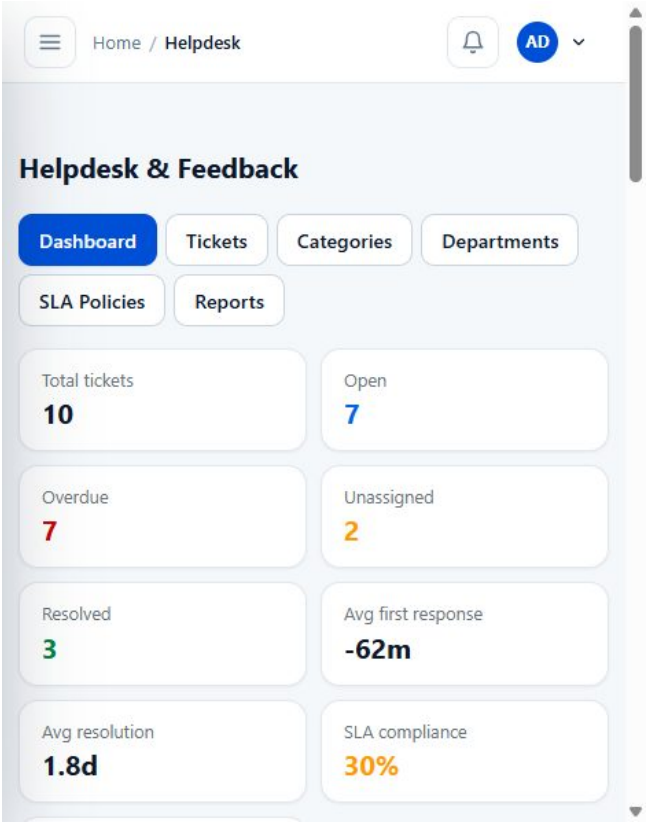

Helpdesk / helpdesk

Ticket-based support for students and staff - raise, assign, resolve and export tickets.

Example / quick how-to > Assign an open ticket to a department, add updates, and mark it resolved.

Permissions you have (College Admin > TENANT_ADMIN):

helpdesk.view	helpdesk.create	helpdesk.update
helpdesk.delete	helpdesk.export	helpdesk.manage

mod-16-helpdesk-2026-10-11T15-11-51-727.jpg

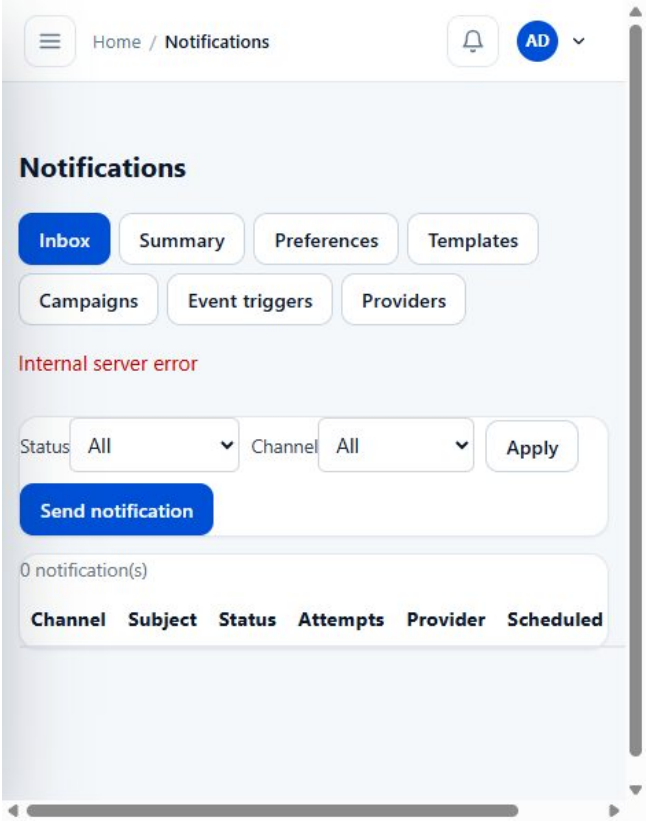

Notifications / notifications

Send and schedule notifications, manage templates, campaigns and triggers.

Example / quick how-to > Create a notification template, launch a campaign to a student group, and review delivery.

Permissions you have (College Admin > TENANT_ADMIN):

notifications.read	notifications.send	notifications.templates.manage
notifications.campaigns.manage	notifications.triggers.manage	notifications.config.manage

mod-17-notifications-2026-10-11T15-12-01-230.jpg

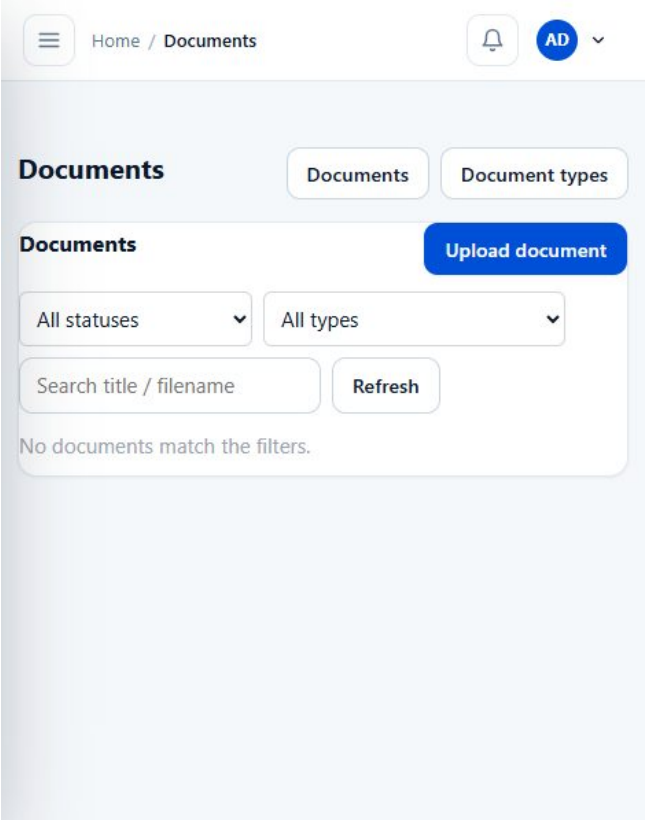

Documents / documents

Central document store per tenant - upload, organise, approve and control access.

Example / quick how-to > Upload a policy document, set visibility, and route it through approval.

Permissions you have (College Admin > TENANT_ADMIN):

documents.read	documents.manage	documents.approve
workflows.view	workflows.approve	workflows.manage

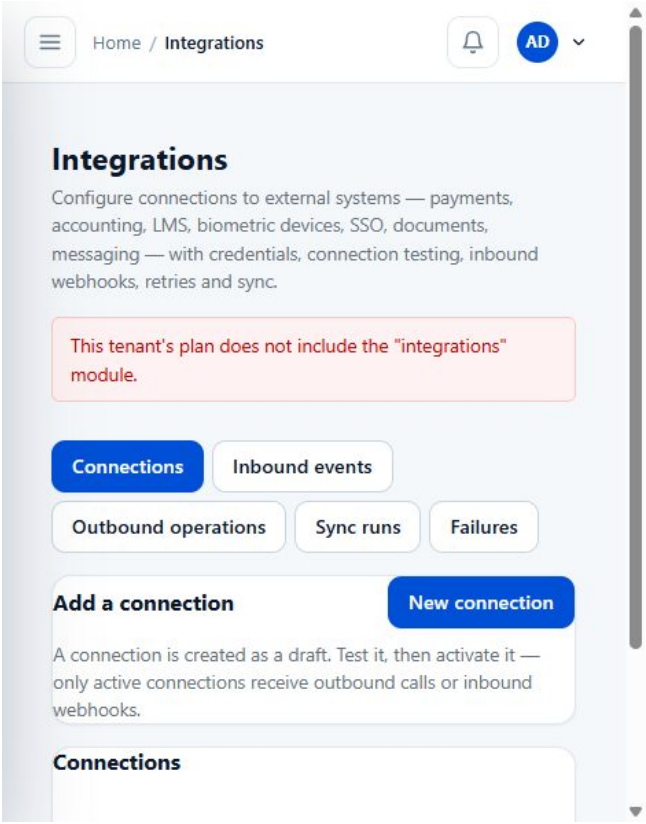

mod-18-documents-2026-10-11T15-12-12-355.jpg

Integrations / integrations

Connect external services (SMS, email, payments, ERP tools) via a generic framework.

Example / quick how-to > Enable an SMS provider integration and test the connection from the integration list.

Permissions you have (College Admin > TENANT_ADMIN):
integrations.view integrations.manage

mod-19-integrations-2026-10-11T15-12-37-511.jpg

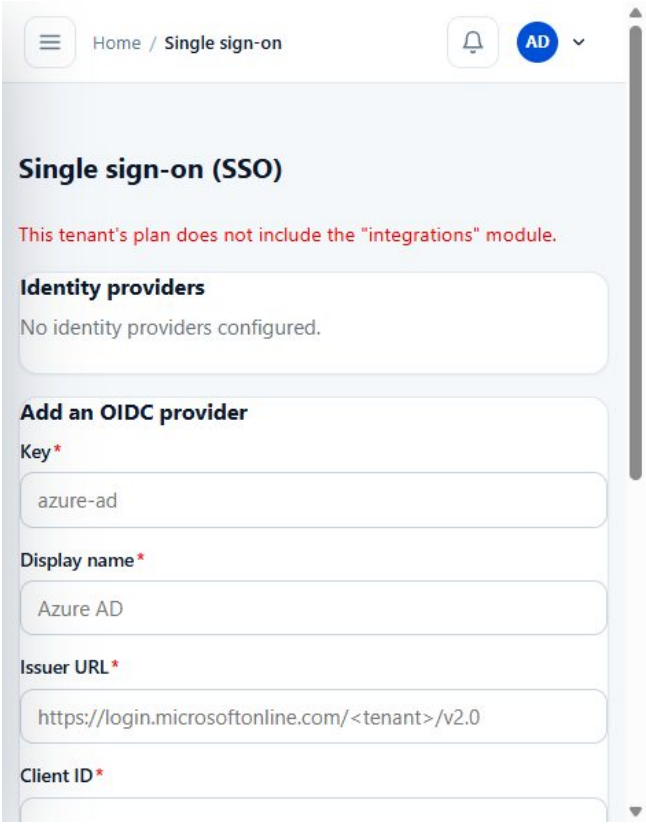

Single sign-on / identity

Configure SSO providers (Google, Microsoft, SAML/OIDC) so users sign in once.

Example / quick how-to > Add an OIDC provider, copy the callbacks, and set it as the tenant's default sign-in method.

Permissions you have (College Admin > TENANT_ADMIN):

identity.view identity.manage

mod-20-identity-2026-10-11T15-19-01-394.jpg

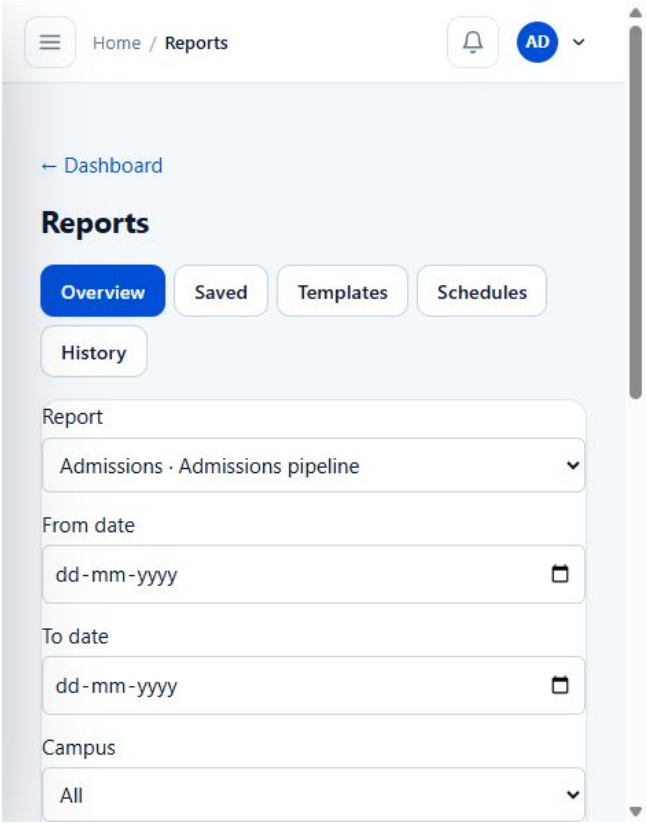

Reports / reports

Prebuilt institutional reports across modules with export to file.

Example / quick how-to > Open the Reports centre and export the attendance or fee-collection report for the current term.

Permissions you have (College Admin > TENANT_ADMIN):

students.export	attendance.export	admissions.export
fees.export	payments.export	results.export
certificates.export	hr.export	placements.export
helpdesk.export	reports.view	reports.export
reports.manage	ai.export	

mod-21-reports-2026-10-11T15-19-23-553.jpg

Import / Export / imports

Bulk data operations - import students/records from CSV and export data from any module.

Example / quick how-to > Download the CSV template, fill it, upload it, and review the import summary for errors.

Permissions you have (College Admin > TENANT_ADMIN):

students.export	attendance.export	admissions.export
fees.export	payments.export	results.export
certificates.export	hr.export	placements.export
helpdesk.export	reports.export	ai.export

mod-22-imports-2026-10-11T15-19-39-727.jpg

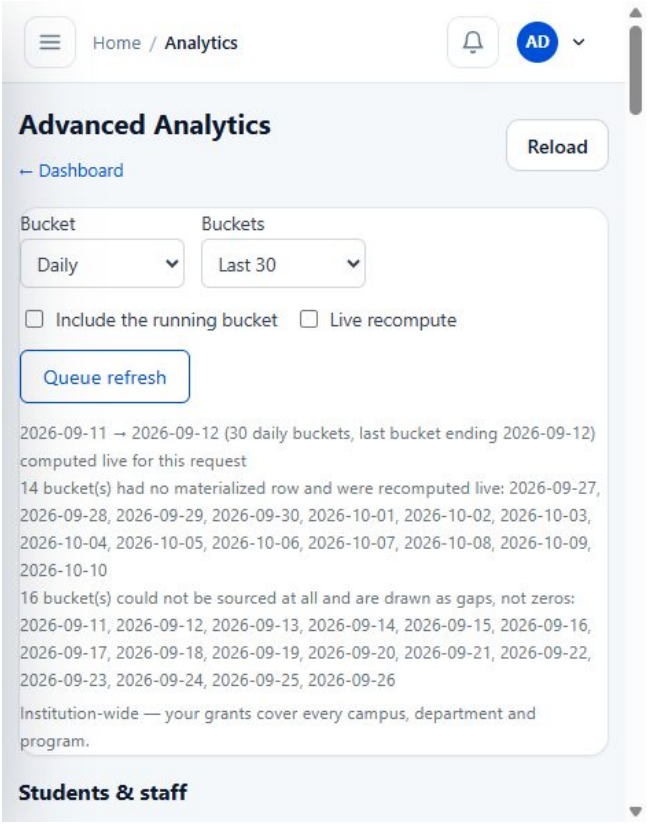

Analytics / analytics

Dashboards and insights across academics, attendance, finance and campus operations.

Example / quick how-to > Open Analytics and click **Refresh** to rebuild the KPI dashboard from live data.

Permissions you have (College Admin > TENANT_ADMIN):

analytics.view analytics.refresh campus.analytics.view

mod-23-analytics-2026-10-11T15-20-11-429.jpg

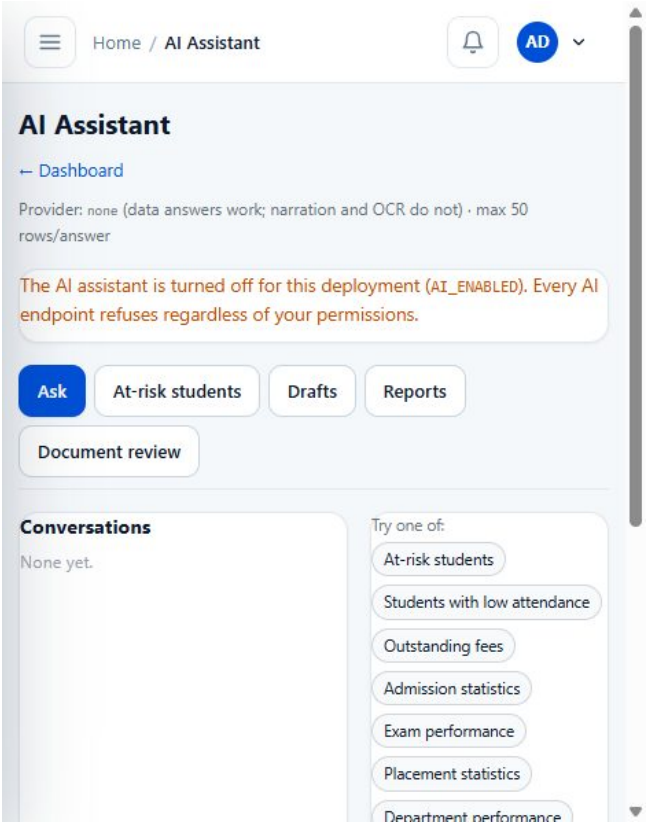

AI Assistant / ai-assistant

An in-app AI assistant to answer questions about students, academics and operations.

Example / quick how-to > Ask the assistant for a quick summary of this term's attendance outliers.

Permissions you have (College Admin > TENANT_ADMIN):

ai.view	ai.create	ai.update
ai.delete	ai.export	ai.manage
search.view		

mod-24-ai-assistant-2026-10-11T15-20-32-119.jpg

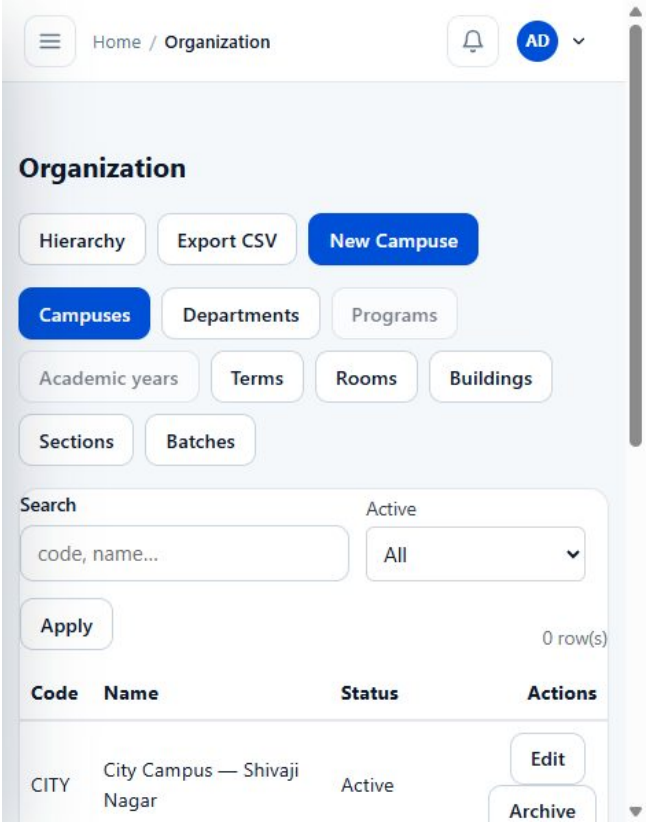

Organization / organization

Org-level setup: departments, programmes, academic years, terms, buildings, rooms, sections, batches and users/roles.

Example / quick how-to > Add a department, define the current academic year + term, then create programs under them.

Permissions you have (College Admin > TENANT_ADMIN):

users.read, users.manage, roles.read, roles.manage, departments.read, departments.manage, programs.view, programs.manage, academic_years.read, academic_years.manage, terms.read, terms.manage, rooms.read, rooms.manage, buildings.read, buildings.manage, sections.read, sections.manage, batches.read, batches.manage

mod-25-organization-2026-10-11T15-20-44-897.jpg

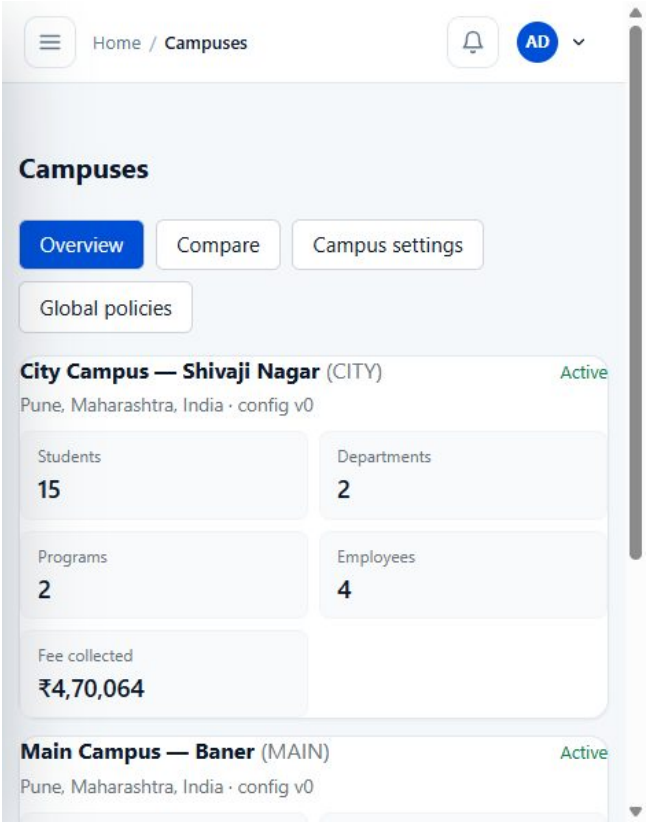

Campuses / campuses

Manage one or more campuses, their locations, settings and policies.

Example / quick how-to > Create a second campus, review its settings, and manage campus policies.

Permissions you have (College Admin > TENANT_ADMIN):

campuses.read, campuses.manage, campus.settings.view, campus.settings.manage, campus.policies.manage

mod-26-campuses-2026-10-11T15-21-06-054.jpg

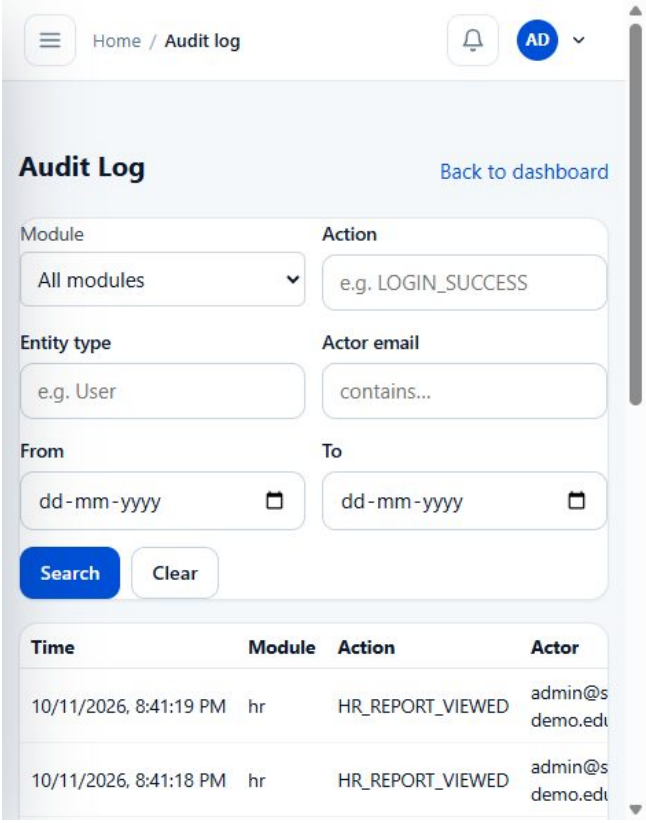

Audit log / audit

Full trace of who did what inside the tenant - logins, changes, admin actions.

Example / quick how-to > Search the audit trail by user or action to audit a recent change.

Permissions you have (College Admin > TENANT_ADMIN):

audit.read security.settings.view security.settings.manage security.events.view

mod-27-audit-2026-10-11T15-21-26-235.jpg

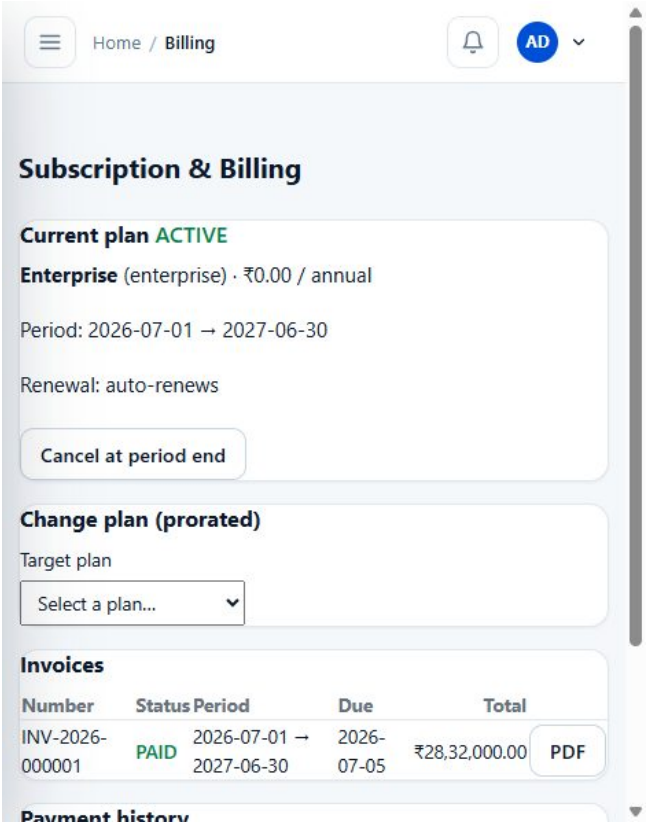

Billing / billing

Subscription and billing for the tenant - plan, invoices and payment status.

Example / quick how-to > Review current plan usage and view latest invoices from the billing dashboard.

Permissions you have (College Admin > TENANT_ADMIN):

tenant.billing.view billing.update fees.view
fees.create fees.update fees.refund
fees.export fees.manage payments.view
payments.create payments.export payments.manage

mod-28-billing-2026-10-11T15-21-43-373.jpg

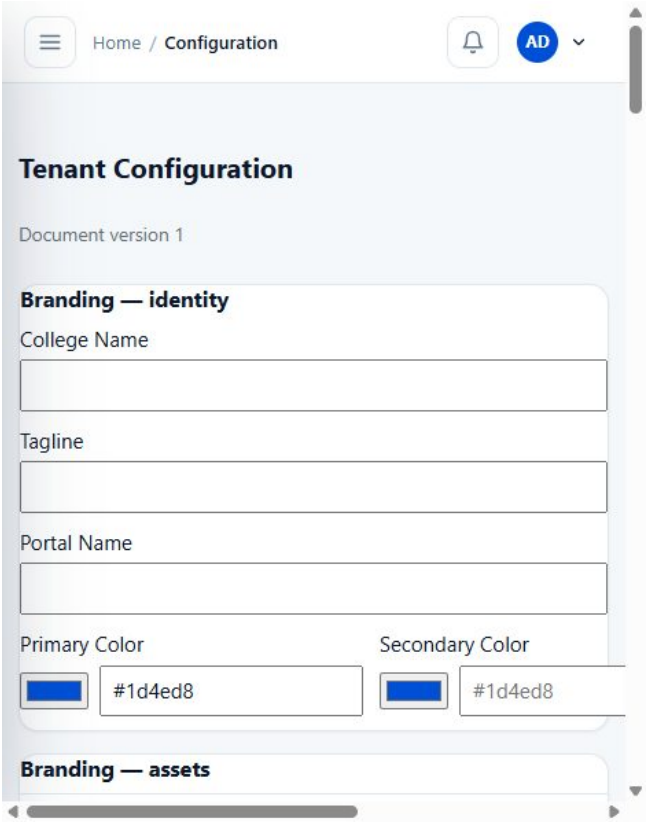

Configuration / settings

Tenant-wide configuration: branding, settings, feature flags and security settings.

Example / quick how-to > Flip a feature flag on, update branding, and review security settings from one screen.

Permissions you have (College Admin > TENANT_ADMIN):

tenant.settings.manage	tenant.features.view	tenant.config.view
tenant.config.manage	security.settings.view	security.settings.manage
workflows.view	workflows.approve	workflows.manage

mod-29-configuration-2026-10-11T15-22-14-439.jpg

4 The permission catalog - all 154 permission codes

This is every permission code defined in the system, grouped by module area. The **TENANT_ADMIN** (College Admin) role receives all of them; other roles receive a subset. These codes are enforced by the API on every request, and the UI hides anything you cannot do.

Tenant / billing

tenant.settings.manage	tenant.features.view	tenant.billing.view

Identity / SSO

identity.view	identity.manage

5 The platform (SaaS control plane) - manage all tenants

The **Platform Admin** is a separate application at **/platform/login** that operates across all tenants. You use it to create colleges (tenants), watch system health, review billing, and inspect the global audit trail.

• **Step 1.** Go to **http://localhost:5173/platform/login** and sign in with **platform-admin@college-erp.local** / **ChangeMe123!**.

• **Step 2.** The dashboard shows all tenants, active users, storage, support tickets, and **System health** (Database: ok, Redis: ok).

• **Step 3.** Open **Tenants** to see every college - including your new tenant **parth**.

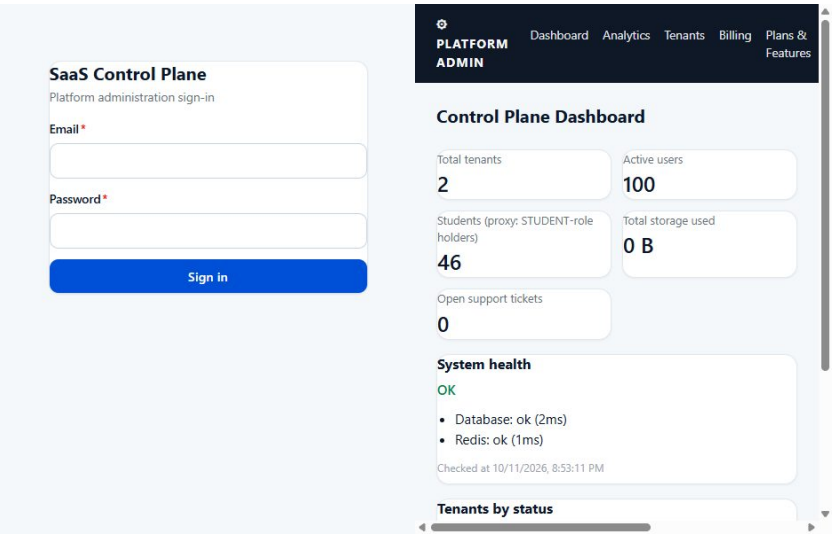

Figure 4 - Platform login & control-plane dashboard (health: Database ok, Redis ok)

Tenants in this database (from the platform console)

Tenant	Slug	Status	Data
Sunrise Institute of Technology & Management	demo-college	ACTIVE	46 students, seeded demo
parth (Parth's college)	parth	ACTIVE	1 admin user, empty - ready to set up

6 Your tenant: slug 'parth'

Your college already exists in the database as tenant slug **parth** (status ACTIVE), with you as its first **College Admin** user: **parth@gmail.com**. The password was reset to the local dev password **ChangeMe123!** so you can sign straight in. The tenant is intentionally fresh - a clean database with zero students - so everything you add is yours alone.

What the database currently holds for 'parth':

Item	Count	Notes
Tenant	1	slug = parth, name = parth, ACTIVE
Admin user	1	parth@gmail.com - Parth Prajapati - College Admin
Roles	15	College Admin / Principal / Registrar / Accountant / Faculty / Student / Parent, etc.
Students	0	you create them in Students
Campuses	0	add one under Campuses
Subscriptions	3	active plan rows for the tenant

Suggested 15-minute setup order for 'parth':

• **Configuration** - give the college its name, branding and feature flags.

• **Organization** - add departments and the current academic year + terms.

• **Academics** - create programmes with their courses.

• **Campuses** - create your campus (location + settings).

• **Users** - add staff (Principal, Registrar, Faculty) so records can be distributed.

• **Students / Admissions** - start adding student records or import a CSV.

7 End-to-end flow - a typical day, then logout

This is the complete login-to-logout journey through the product using your own tenant:

• **Login**: localhost:5173 → slug **parth** → parth@gmail.com → dashboard

• **Dashboard**: check the 28 modules, 154 permissions, system highlights.

• **Academics**: open Organization / Academics, define programmes & terms.

• **Admissions**: register an enquiry → approve → offer.

• **Students**: create the student record and upload documents.

• **Timetable & Attendance**: publish the timetable, then mark daily attendance.

• **Examinations**: schedule the exam → enter results → publish.

• **Certificates**: issue a certificate; anyone can verify it via /verify/certificate.

• **Campus services**: use Library, Hostel, Transport, Inventory, HR, Placements, Helpdesk.

• **Operations**: send Notifications, keep Documents in one place, connect Integrations, enable SSO, review Reports, Import/Export, Analytics and the AI Assistant.

• **Administration**: watch the Audit log, keep Billing current, tune Configuration.

• **Platform** (admin): check system health, tenants and global audit at /platform/login.

• **Logout**: click **Sign out** in the sidebar (tenant) or **Log out** (platform) to end the session securely.

Other entrances (portals used by students / parents / faculty)

Alongside the administration app there are separate portals for other audiences:

• **/portal** - Student portal: dashboard, ID card, profile, attendance, timetable, courses, fees & payments, exams, results, certificates, library, hostel, transport, notices, tickets, documents.

• **/parent** - Parent portal: dashboard, attendance, timetable, fees & payments, exams, results, notices, documents, transport, hostel.

• **/faculty** - Faculty portal: dashboard, profile, courses, students, timetable, attendance, marks, academics, leave, workload, notifications, reports.

• **/verify/certificate** and **/verify/student-id** - public verification pages for issued certificates and student ID cards.

• **/platform** - Platform (SaaS) admin console.

Key takeaway — log in with your tenant slug once, browse the 28 modules in the sidebar, and the UI only shows what your role allows. Every action you take is recorded in the Audit log, and Sign out ends the session. The whole journey from login to logout is what this guide has walked you through.
